

Timestables Clubs

Below is a detailed breakdown of how we implement times tables at Warstones and when the children are tested for their certificates.

Tables are learnt in the following order, 5,10,2,3,4,6,8,9,7,11,12. First the multiplication facts and then the division facts.

They will initially be taught the 10 and 5 times tables. This will be followed by the 19 Club test (Test 1). Once completed they will be tested on the division facts for the same tables and complete the 19 division test (Test 2). The children have 5 minutes to complete each test. This pattern continues until the children are on the 100 Club which is 100 mixed tables+ and then subsequently, the 150 Club.

The order is as follows:

Test 1	19 Club Multiplication	(x5 x10)
Test 2	19 Club Division	(x5 x10)
Test 3	27 Club Multiplication	(x2 x5 x10)
Test 4	27 Club Division	(x2 x5 x10)
Test 5	40 Club Multiplication	(x2 x3 x4 x5 x10)
Test 6	40 Club Division	(x2 x3 x4 x5 x10)
Test 7	55 Club Multiplication	(x1 x2 x3 x4 x5 x6 x7 x8 x9 x10)
Test 8	55 Club Division	(x1 x2 x3 x4 x5 x6 x7 x8 x9 x10)
Test 9	100 Club	Mixed tables
Test 10	150 Club	Mixed questions

The children can be supported at home by practising their tables with adults and through the many games and videos that are available online. Youtube have a fantastic selection of videos based on songs which are catchy for the children to learn and the children have Login details for other websites such as Education City.
